Profile

As a passionate and detail-oriented Frontend Developer, I am eager to apply my skills in HTML, CSS, JavaScript, and modern frameworks like React.js to create user-friendly and responsive web applications.

PROJECTS

YouTube and Amazon Clone

- Project Description: Created a responsive clone of the YouTube homepage, featuring a dynamic layout with video thumbnails, search bar, and navigation menu. Implemented various interactive components such as video play button, hover effects, and the sidebar for categories.

Rock, Paper, Scissors Game

- Project Description: Developed a console-based game where users play Rock Paper Scissors against the computer. Implemented game logic using JavaScript, including random choice generation and user input handling. Demonstrated problem-solving by ensuring correct win conditions and managing user input.

Tic Tac Toe Game

- Created a two-player Tic Tac Toe game either as a console application or web-based. Developed the core game mechanics, including turn-based play, win-condition checks, and player input validation. Implemented an interactive interface allowing users to easily play the game.
